Declaration on Substance Bans/Substance Limitations Reach

Regulation (ec) No 1907/2006 (reach Regulation) is an EU chemicals regulation which entered into force on 01 June 2007. As an EU regulation, reach applies equally and directly in all member states.

The ATE Antriebstechnik und Entwicklungs GmbH & Co. KG itself does not produce any chemical products or compounds at the moment. The ATE Antriebstechnik und Entwicklungs GmbH & Co. KG therefore sees themselves as downstream users in the sense of Reach. This can result in commitments that we are aware of. Therefore, we consult our suppliers systematically and at regular intervals according to your (pre-) registration intentions. The ATE Antriebstechnik und Entwicklungs GmbH & Co. KG ensures that the products delivered to your customers comply with the material requirements of the aforementioned regulations according to the best knowledge and current knowledge. We do not use substances which are subject to registration and are not registered.

ATE Antriebstechnik und Entwicklungs GmbH & Co. KG do not use so-called candidates pursuant to article 59 Reach.

ATE Antriebstechnik und Entwicklungs GmbH & Co. KG do not use substances listed in annexes XIV and XVII reach (substances subject to Authorisation) – irrespective of whether they exist for these substances or not so far as the prohibitions or restrictions apply.
